## CHIEF EXECUTIVE OFFICER'S MESSAGE

行政總裁的話

### The Spirit of "AEL"

In 2025, thanks to the effort and perseverance of all our colleagues, AEL achieved inspiring results. We not only successfully secured multiple large-scale projects in the environmental engineering sector but also made steady progress across various business areas, including infrastructure engineering, logistics & automation, engineering services, and lift engineering. Meanwhile, our continuous drive for technological innovation and service enhancement has earned widespread recognition from the market, business partners, and clients. These achievements are rooted in our core value —the Spirit of "AEL" — which is not only represents our company's name but also serves as the foundation of our corporate culture.

The Spirit of "AEL" represents connection, collaboration, and mutual success. It reflects the trust among colleagues, the synergy between departments, and our shared commitment to working hand in hand with partners, clients, and the community. This spirit drives us to pursue excellence in our professional fields, innovate in the face of challenges, and always uphold integrity, delivering outstanding engineering services that contribute to sustainable development of society.

Looking back over the past year, the Spirit of "AEL" has been evident in our diverse projects and activities: from Zael and AEL's collaboration to expand environmental engineering initiatives, to the Construction Engineering Unit's successful delivery of the airport's 3D LED advertising billboard project; from the Environmental Engineering Unit's promoting of yard waste recycling, to the Engineering Services Unit providing round-the-clock support for government maintenance projects; and from organizing activities that promote employees' physical and mental well-being to actively engaging in community service and giving back to society. These collective efforts have not only shaped a corporate culture of unity and advancement but also solidified our position as a trusted partner within the industry.

In 2025, we organized our first company trip to Taiwan, providing team members the valuable opportunities to step away from their busy schedules, unwind, and deepen their connections with one another. Many colleagues brought their families, fostering a spirit of camaraderie and allowing everyone to enjoy meaningful interactions throughout the trip. This experience has helped us forge a more resilient team.

I would like to take this opportunity to express my heartfelt gratitude for your hard work over the past year. It is your dedication and efforts that have led us to achieve such remarkable results in a highly competitive marketplace. Each member's contribution is indispensable to our success, and we should take pride in each other's accomplishments.

Looking ahead, we will continue to uphold our commitment to "Strive for Excellence, Innovate for Future" to create an open and inclusive work environment where everyone can unleash their potential while attracting more talented individuals to join us. In 2026, we will celebrate the 65th anniversary of AEL, marking an important milestone worth commemorating. We look forward to achieving even greater successes together in the new year!

## 「聯誼」精神

在2025年，我們公司憑藉著全體同事上下一心的努力與堅持，取得了令人鼓舞的成績。我們不僅成功於環境工程領域競投得多個大型項目，亦在基建工程、物流自動化、工程服務及升降機工程等各業務範疇，實現了穩步的發展；而在持續推動技術創新與服務優化方面，亦贏得了市場，合作夥伴與客戶的廣泛認同。這一切，皆源於我們核心的「聯誼」精神——這不僅是我們公司的名稱，更是我們公司文化的基石。

「聯誼」精神代表著連結、協作與共贏。它凝聚了同事間的信任、部門間的協調，以及我們與合作夥伴、客戶、社區之間攜手並進的承諾。這份精神驅動我們在專業領域精益求精，於挑戰當前齊心創新，始終秉持誠信，以卓越工程與服務，貢獻社會的可持續發展。

回顧過去一年，「聯誼」精神體現於我們不同的項目及活動之中：從香港聯誼與珠海聯誼機電共同拓展環保工程，到基建工程部成功打造機場3D LED廣告牌項目；從環境工程部推動園林廢物回收，到工程服務團隊為政府維修項目提供全天候專業支援；從關懷員工身心健康的多元活動，到積極投身社區服務、回饋社會的實際付出。這些點滴累積，不僅塑造了團結奮進的企業文化，更鞏固了我們在業界值得信賴的合作夥伴地位。

另外，2025年我們首次組織了前往台灣的公司大旅行，這次旅程讓團隊成員得以暫時遠離繁忙的工作，放鬆心情，並增強了彼此之間的聯繫。特別是同事及其家人也一同參與，讓大家在新環境中享受互動與交流，形成了一個更加具韌性的團隊。

在此，我想特別感謝每一位同事在過去一年中的辛勤付出。正是因為你們的努力與奉獻，我們才能在如今競爭激烈的市場中取得如此佳績。每一位成員的貢獻都是我們成功不可或缺的一部分，讓我們一起為彼此的成就而自豪。

展望未來，我們將持續以「聯誼精神」為指引，堅持「精益求精，創新未來」的宗旨去努力建立一個開放、包容的工作環境，以令每位員工都能在這裡發揮潛能，同時吸引更多優秀人才的加入。2026年，聯誼將慶祝成立65週年，這將是公司一個值得紀念的重要里程碑。期待在新的一年里，我們攜手共創更多佳績！

## New 3D LED Advertising Billboard at HK International Airport

香港國際機場 - 設計、製造和安裝全新3D LED廣告牌

AEL is proud to announce the successful completion of the first and largest 3D LED advertising billboard at the M&G Hall of Hong Kong International Airport. This remarkable structure measures 3 + 13.8 + 3 meters in height and 5.1 meters in width, showcasing our advanced capabilities in LED technology.

Equipped with high-resolution LED panels featuring a pixel pitch of just 2.5mm, the billboard offers stunning clarity and vibrant colors, capturing the attention of all who pass by. Behind this impressive display is a robust steel framework that connects seamlessly to the circular concrete columns, ensuring both stability and durability. The external finish of the billboard is clad in high-quality aluminum, providing a sleek and modern appearance.

Given the billboard's strategic location over a major passenger routing corridor leading to public transport connections, safety was paramount throughout the construction phase. Our team implemented a comprehensive protection system featuring a steel scaffolding structure with a tunnel configuration, ensuring uninterrupted passenger flow and complete safety during installation.

Understanding the importance of passenger comfort in this 24/7 operational environment, we took extraordinary measures to minimize disruption. The entire metal scaffolding framework was enclosed with two layers of canvas, effectively reducing construction noise and visual interference while maintaining the airport's premium passenger experience.

Construction within an airport environment comes with unique challenges, particularly regarding the stringent constraints of airport regulations. With welding works strictly prohibited in the airport area, our approach demanded meticulous planning and execution. To guarantee both accuracy and quality, we conducted a complete full-scale mockup at our workshop facility prior to on-site installation. This comprehensive pre-assembly process eliminated potential issues, ensured perfect fit and alignment, and minimized on-site construction time, demonstrating our commitment to excellence in every phase of this landmark project.

聯誼於香港國際機場接機大堂的首個也是最大型的3D LED廣告牌成功竣工。這座卓越的結構高3 + 13.8 + 3米，寬5.1米，展示了我們在LED技術方面的先進能力。

該看板配備高解析度LED面板，圖元間距僅為2.5毫米，提供了令人驚歎的清晰度和生動的色彩，吸引了每一個路過的人。令人印象深刻的展示後面是一個堅固的鋼框架，完美連接到圓形混凝土柱，以確保穩定性和耐用性。看板的外部裝飾採用高品質鋁材，提供了流暢現代的外觀。

鑒於看板位於主要乘客通道的戰略位置，通往公共交通連接，安全始終是施工階段的重中之重。我們的團隊實施了一套全面的保護系統，採用隧道式鋼腳手架結構，確保乘客流動不受干擾並在安裝過程中完全安全。考慮到在這個全天候運營環境中，乘客舒適的重要性，我們採取了非常措施以減少干擾。整個金屬腳手架框架用兩層畫布封閉，有效降低了施工噪音和視覺干擾，同時維護了機場的優質乘客體驗。

在機場環境中施工面臨獨特挑戰，尤其是機場法規的嚴格限制。由於機場區域嚴格禁止焊接作業，我們的方式要求細緻的規劃和執行。為確保準確性和品質，我們在現場安裝前在我們的工作坊設施中進行了完整的全規模模型製作。這一全面的預組裝過程消除了潛在問題，確保了完美的貼合和對齊，縮短了現場施工時間，展示了我們在這個里程碑專案的每個階段對卓越的承諾。

## 2 Driving Hong Kong's Green Future Through Yard Waste Recycling

### 引領香港綠色未來的園林廢物回收項目

AEL is honored to have been awarded a new service contract by the Environmental Protection Department for the "Yard Waste Recycling Centre" (Y-PARK), taking on the mission of transforming yard waste into valuable resources. Hong Kong generates about 200 tonnes of yard waste every day, mainly from routine plant maintenance and public works, with volumes surging during typhoons and other extreme weather events. If not properly handled, this yard waste can place a significant burden on the environment. AEL's goal is to collect and sort this material, identify high-quality, suitable fractions for recycling, and convert them into higher-value recycled products, putting the concept of "waste-to-resource" into practice.

Located at Lung Kwu Sheung Tan in Tuen Mun and occupying an area of over one hectare, Y-PARK is equipped with comprehensive facilities and robust safety systems. The centre can process at least 15 tonnes of yard waste per day using efficient wood shredding, drying, and woodworking technologies. Tree trunks, branches, and twigs are processed into wood chips for use as landscaping mulch, feedstock for biochar production, or raw material for compost that improves soil fertility. Larger trunks can be transformed into timber boards and planks for construction and interior fitting-out, as well as for furniture and other diversified recycled wood products, which can be widely applied in agriculture, horticulture, landscaping, and industrial uses. AEL has also introduced intelligent management systems to ensure transparent, efficient operations that comply with stringent safety and environmental standards.

Beyond the technical aspects, AEL places strong emphasis on social responsibility and public education. The company actively promotes green values through its website, social media platforms, and exhibitions to enhance public awareness of resource circulation. A membership scheme has been established to allow the public to collect recycled wood materials free of charge, encouraging reuse. AEL also participates in government-led events such as the Hong Kong Flower Show and various recycling campaigns to advocate for low-carbon living.

AEL firmly believes that environmental protection is not just a job, but a long-term commitment. We dedicated to supporting Hong Kong's transformation into a greener city and working with the community towards a "zero-waste future." Y-PARK is not only a recycling centre, but also a platform that realises the full value of wood resources, reduces environmental impact, and advances circularity and sustainable development.

聯誼很榮幸獲得環保署「園林廢物回收中心」（Y· PARK）新一輪服務合約，肩負起將園林廢物轉化為資源的使命。香港每天產生約200公噸園林廢物，主要來自日常植物保養的清理工作和工務工程所產生的園林廢物，颱風等極端天氣更會令園林廢物量急增。這些園林廢物若未能妥善處理，將造成環境負擔。我們的目標，是將這些看似無用的園林廢物，收集及篩選園出當中優質合適的部分進行回收再造，製成較高價值的再生產品，實踐「廢物變資源」的理念。

Y· PARK位於屯門龍鼓灘，佔地逾一公頃，設有完善的設施及安全系統。我們每天可處理至少15公噸的園林廢物，透過高效的木材破碎設備、乾燥及木工技術，將樹幹、樹枝、嫩枝等製成木碎，用作園藝覆蓋物、生物炭生產等；也可作為堆肥的原料，提供土壤養分；粗大樹幹可轉化為木板、木方等建築材料，可用於室內裝修、家具製作等多元化再生產品，廣泛應用於農業、園藝、景觀美化及工業用途。我們更引入智能化管理系統，確保操作透明、高效，並符合安全及環保標準。

除了技術層面，我們更重視社會責任與公眾教育。聯誼積極推動綠色理念，透過網站、社交媒體及展覽活動，提升市民對資源循環的認識。我們設立會員機制，讓市民免費領取再生木材，鼓勵資源再用，並參與政府主導的花展及回收活動，推廣低碳生活。

聯誼深信，環保不僅是一項工作，更是一份承諾。我們將致力打造香港成為綠色城市，攜手社會邁向「零廢未來」。Y· PARK不僅是一個回收中心，更可發揮木材資源的價值，同時減少對環境的影響，實現循環再用和可持續發展的目標。

## Automatic Refuse Collection System at HSITP - The First Fire-rated Automatic Refuse Collection System in Hong Kong

港深創科園的自動垃圾收集系統 - 全港第一套符合防火要求的自動垃圾收集系統

AEL has launched an important project at the Hong Kong-Shenzhen Innovation and Technology Park aimed at enhancing overall waste management efficiency. This project is named "Design, Supply, and Installation of an Automatic Waste Collection System," primarily focusing on the deployment in the eighth and ninth buildings of Phase 1. It is also the first system in Hong Kong that meets fire safety requirements and features electronic scales for real-time measurement of different types of waste, compatible with a mobile application.

In this project, we have installed 19 waste collection doors in these two buildings, including 3 specifically designed for recyclable waste, while the others are used for collecting general household waste. Additionally, we have established a central waste station equipped with four compaction machines, one household waste collection box, three recycling boxes, and other components such as four separators, one flow distributor, and four powerful fans. This entire system will effectively integrate waste collection within the Hong Kong-Shenzhen Innovation and Technology Park, promoting environmental friendly practices and resource recycling, thereby significantly improving waste processing efficiency in the area.

聯誼於港深創科園展開了一項重要的工程，旨在提升整體廢物管理效率。該項目名為「設計、供應及安裝自動垃圾收集系統」，主要針對第一期第八及九座大樓進行部署。

以及是全港第一套符合防火要求並設有電子磅實時量度不同垃圾重量的自動垃圾收集系統，系統兼容手機應用程式。

項目中，我們在這兩座大樓內安裝了19個垃圾槽門，其中包括3個專為環保回收垃圾設計的垃圾槽，其他則用於收集生活垃圾。此外，我們也建立了一個中央垃圾站，內設四部壓實機、一部生活垃圾收集箱、三部環保回收箱及其他配件，如四部分離器、一部分流器及四部大風機。這一整套系統將有效整合港深創科園內的廢物收集，促進環保與資源回收的良好實踐，顯著提升園區內的垃圾處理效率。
